RE: Polychlorinated Biphenyl Risk-Based Cleanup and Disposal Request for Property Located at
100 West 10th Street, Washington, Missouri

Dear Mr. Schiermeier:

The U.S. Environmental Protection Agency Region 7 has reviewed the Risk-Based Cleanup and Disposal Request (workplan) dated September 23, 2016, regarding Polychlorinated Biphenyl remedial activities at the Former Pauwel's Transformer Site. The workplan request was for soil removal and confirmation sampling under 40 CFR 761.61(c) approval requirements to a cleanup standard of less than one part per million resulting in unrestricted use conditions. The EPA hereby approves the workplan with the following conditions:

1. The workplan field activities shall be initiated within 60 days from the date of this letter.
2. A final report documenting the cleanup and disposal activities shall be sent to the EPA within 60 days of completion of field activities.
3. This approval does not include the building demolition, disposal and confirmation sampling. A separate work plan with additional detail should be submitted to address the building contamination if necessary.

All documents shall be sent to Mike Dandurand, 11201 Renner Boulevard, Lenexa, Kansas 66219. If you have any questions, please contact Mike Dandurand, of my staff, by phone at (913) 551-7504 or by email at dandurand.michael@epa.gov.

Sincerely,

Becky Weber
Director
Air and Waste Management Division
